D-A® LUBRICANT COMPANY

# Bag-in-a-Box

## Convenient Dispensing System

D-A Lubricant® is excited to announce the new look of our six-gallon Bag-in-a-Box packaging! This low-waste packaging concept replaces bulky containers and drums without compromising durability and dependability while protecting your oil! Below you will find products/part numbers that are offered in our BIB packaging.

## Convenient Dispensing System

## PRODUCT DETAILS

**Bag-in-a-Box units were created to enable jobbers/installers to have a wide variety of products/viscosities in stock without having to inventory large amounts.**

- **Better inventory control**
- **Takes up less floor space**
- **Easy-pour containers**
- **Multiple grades on one rack**
- **Optimized storage**
- **Durable dispensing jugs with spouts**
- **Boxes have resilient crush strength designed to maintain structure**

### FAQs

- 2 Rack/Jug Kits will fit on one pallet and weigh approximately 17 lbs each and arrive preassembled.
- Each rack is 26.5" wide, 18" deep and 67" high. Add Bag-in-a-Box units and it becomes 80" high and 21.5" deep.
- 35 Bag-in-a-Box units will fit on one pallet. Bag-in-a-Box units weigh approximately 46 lbs. each. Pallet of 35 weighs approximately 1,625 lbs. Please exercise caution when lifting and moving the units.
- Must pay shipping costs.

*Six quart dispensing jug with 14" flexible spout and clearly marked gradient levels on the side for convenience. Each jug has it's own attached lid to help keep the jug clean when its not being used.*
