ENGINE ASSEMBLY LUBRICANT

PennGrade 1® Engine Assembly Lubricant is a premium high-viscosity lubricant specifically designed to offer additional protection for “green” moving surfaces in engine assembly applications. Its premium base oil provides higher load-carrying ability and excellent surface film protection to prevent wear in highly-stressed internal components.

PENNGRADE®
HIGH PERFORMANCE OIL

The Original Green Oil®

PennGrade 1® High Performance Engine Assembly Lubricant is a great complement to the PennGrade 1 High Performance line.

PennGrade 1® Engine Assembly Lubricant is recommended as a pre-lube for engine components including cam lobes, lifters, wrist pins, rod bearings, main bearings, etc. It is the lubricant chosen by engine mechanics performing in-frame diesel rebuilds. It will not run or drip from treated parts due to its tacky/stringy nature and will protect assembled engines from rust and corrosion during assembly period and shipment.

The very makeup of this product gives it an extreme advantage over competitors’ products due to its ability to adhere to internal parts/components, protecting from wear at start-up!

This is designed and tailored specifically for gasoline and diesel engine related assemblies.
