

BEAUTY NEEDS PROTECTION.

A product of D-A Lubricant Company,
PennGrade 1® is the
“**Original Green Oil.**”

There is no better protection for pre-catalytic converter engines than **PennGrade 1**. It provides an exceptionally-durable coating for camshafts, lifters and liners for high-RPM dragsters, muscle cars, hot rods, dirt track racers, late-model stockers and classic vintage automobiles.

Today's **PennGrade 1** is the same high-zinc, high-phosphorus formulation that's been known and trusted by high-performance engine builders and vehicle owners for decades. The name and label have changed over the years, but what's inside the bottle has not.

Always the Original Green Oil.

The Original Green Oil.
